My Projects

Quizzes & Exams Management System*(thesis)*

Team(size: **2**, role: **back-end**)   *Aug 2024 – Dec 2024*

Description: Developed a question management and automatic exam paper generation system that aims to help lecturers easily personalize the generation exams and management questions and the data related to exam papers.
Responsibility: Built the server-side functionality, including randomly generating and managing exam papers, managing and classifying questions, classes, courses, chapters, users, permissions, user authentication and authorization(RBAC), and related data.
Technologies: NestJS, MongoDB, GraphQL, TypeORM
Github: https://github.com/locnguyen2k2/exam-management-system

Laboratory Management System

Team(size: **3**, role: **back-end**)   *Jan 2024 – July 2024*

Description: Developed a Laboratory Information Management System (LIMS) that enhances the efficiency of transferring, borrowing, returning, and managing item information for the university laboratory.
Responsibility: Built the server-side functionality, including transferring, borrowing, and returning items; CRUD operations (items, rooms, categories, users, roles, permissions); and user authentication and authorization(RBAC).
Technologies: NestJS, MySQL, Swagger, TypeORM
Github: https://github.com/locnguyen2k2/laboratory-management-system

HiCoffee - Order Management System

Team(size: **2**, role: **full-stack, mobile application**)   *Sep 2022 – Dec 2023*

Description: Developed an ordering system to manage information, the ordering process, statistics and payment.
Responsibility: Built the server-side functionality, including managing orders, payments, statistics, products, categories, areas, tables, invoices, user authentication, and authorization, and developed the client side of the website and application.
Technologies: Php, MySQL, Axios, Ajax, Javascript, React Native, HTML, CSS, bootstrap5, Websocket(Ratchet).
