ABOUT

Full-stack Developer experienced in building scalable APIs, transaction workflows, real-time features, CRUD applications, and POS dashboards. I have worked extensively with NestJS, Go, PostgreSQL, MySQL, MongoDB, React. Passionate about web development, continuous learning, and delivering practical solutions that create value for both users and businesses.

SKILLS

- *Programming languages:* Javascript, TypeScript, Go, SQL, NoSQL.
- *Frameworks and libraries:* NodeJS(NestJS), Go(Gin), React, Ant Design, Sass, CSS.
- *Databases:* PostgreSQL, MySQL, MongoDB.
- *Soft skills:* Teamwork, responsibility, problem solving, adaptive.
- *Programming paradigms and architectures:* RESTful API, GraphQL, Monolith, Microservices.

EXPERIENCE

- **TEKNIX TECHNOLOGY CORPORATION**
Backend Developer - NestJS & Go(Centralized Wallet & Social Chat)
March 2025 - March 2026
Ninh Kieu, Can Tho

- Centralized Wallet: Backend developer for centralized wallet operations supporting real-time transaction on multiple networks
 - **Technologies:** NestJS, PostgreSQL, CockroachDB, Redis, RabbitMQ, Ably, Clickhouse, OTel, API Gateway(Kraken).
 - **Responsibility:**
 - Wallet management and balance tracking across multiple blockchains.
 - Implemented real-time processing for transactions, message queue, rollback, and notification handlers.
 - Built and integrated a financial fraud detection and transaction monitoring system by implementing a Sentinel platform.
 - Designed APIs for dashboard.
 - Real-time Chat & Social Platform: Developed core social media features.
 - **Technologies:** Go(Gin), MongoDB, Peertube, R2 Cloudflare, NATs, API Gateway(Kraken).
 - **Responsibility:**
 - Built CRUD functionality for posts, reels, comments, and playlists.
 - Developed scheduling features for posts and reels.
 - Implemented PeerTube integration for reel video upload, management, and delivery.
 - Implemented approval workflows for posts and reels.
 - Integrated real-time push notifications to improve user engagement.
 - Designed APIs for dashboard.
- **DANG AN TECH COMPANY LIMITED (DA.Tech)**
Frontend Developer - ReactJS, CouchDB, Ant Design, HTML, SASS(POS System)
Apr 2024 - March 2025
Ninh Kieu, Can Tho

- Integrated electronic invoices from suppliers(Viettel and Mobifone)
 - Collaborated with teammates to develop and convert the frontend side

PROJECTS

- **Quizzes & Exams Management System**
Aug 2024 – Dec 2024

Description: Developed a question management and automatic exam paper generation system for the university that aims to helps lecturers easily personalize the generation exams and management questions, and the data related to exam papers.

Responsibility: Build the frontend, and server-side functionality, including randomly generating and managing exam papers, managing and classifying questions, classes, courses, chapters, users, permissions, user authentication with email and authorization(RBAC), and related data.

Technologies: NestJS, MongoDB, Apollo GraphQL, NodeMailer, Pinata, NextJS, Ant design, CouchDB.

Demo: <https://cjoool117-ems-system.vercel.app> **Github:** <https://github.com/locnguyen2k2/exam-management-system>.
- **Laboratory Management System**
Jan 2024 – Jul 2024

Description: Developed a laboratory information management system that enhances the efficiency of transferring, borrowing, returning, and managing item information for the university laboratory.

Responsibility: Build the server-side functionality, including transferring, borrowing, returning items, and CRUD operations (items, rooms, categories, users, roles, permissions) and user authentication with email and authorization.

Technologies: NestJS, MySQL, Swagger, TypeORM, NodeMailer.
